Claims 5, 6, 11 and 13 are objected to because of the following informalities: The last word in claim 5, "phase", is on the same line as the start of claim 6. In claim 11, line 2, a space is needed between "0" and "V". In claim 13, line 2, a space is needed between "3" and "V". Appropriate correction is required.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Colborn *et al.* (US 2003/0077493) disclose a fuel cell used as backup power source, which is connected in response to a control signal.

Claims 1-37 are allowed. The prior art cited herein or by applicants does not disclose a method of improving fuel cell performance including taking the load off the fuel cell when the fuel cell losses at least 5% of its power, and applying power from an external source to reverse electrochemical reactions until at least 5.0% of the lost power is regained.

This application is in condition for allowance except for the following formal matters:

Those stated above with respect to claims 5, 6, 11 and 13.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
